

IN MALAWI,

According to the National Sanitation Policy (2008)

Kondoole Village, TA Mlonyeni, Mchinji District

A BASIC LATRINE:

- Provides functional disposal of feces (it is not full)
- Provides privacy to the user
- Is safe to use (no risk of collapse)
- Is 30 metres or more from a water source

AN IMPROVED LATRINE:

Is the same as a basic latrine, but also features:

- + An “impermeable” floor (traditional smear, cement, etc.)
- + A tight-fitting lid over the hole
